## Classic Analog Keyboards

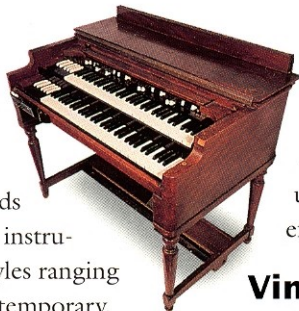

### Vintage Keys

Vintage Keys sample playback modules recreate all the rich, warm, textural sounds made famous by classic analog keyboard instruments. Perfect for a variety of musical styles ranging from classic rock & roll, to new age/contemporary, to hip-hop and industrial, Vintage Keys improves on original analog keyboards and synthesizers with the integration of MIDI compatibility, quieter circuitry, greater reliability and increased space and cost efficiency.

Vintage Keys' 8MB complement of digital samples (user-expandable to 16MB) includes Rhodes and Wurlitzer electric pianos; dynamic Hammond B-3 organs; Prophet, Moog, Oberheim and ARP analog synthesizers; Mellotron strings, choir and winds; and classic first-generation Fairlight and Yamaha digital instruments. And Vintage Keys' 32 dynamic analog-sounding digital filters deliver all the expressive power those instruments were famous for. Combined with special features like polyphonic portamento, variable Leslie control for the B-3 presets, and the unique E-mu® MIDIPatch™ modulation system, Vintage Keys lets you recreate that great analog mood and feel.

Vintage Keys sound modules also feature 32-voice polyphony and 16-MIDI channel multi-timbral operation capabilities—making them ideally suited for multi-track sequencing. Other features include 6 assignable outputs, enabling you to individually process the sounds of your

choice, integral sends and returns for the addition of external effects units without a separate mixer, user-definable alternate tuning capabilities and extensive MIDI implementation.

### Vintage Keys Plus

The Vintage Keys Plus model encompasses all the features and classic analog keyboard sounds found in the original Vintage Keys module plus an additional 8MB of cool sounds Vintage enthusiasts have been asking for. Like Dyno Rhodes and Yamaha FM synthesized electric pianos; classic Emulator II and Emulator III sample snippets; more Sequential Circuits, Moog, Oberheim, Roland and ARP analog synthesizers; E-mu SP-1200, Roland DR-55 and Roland TR-808 drum machines; and classic stringed instruments including Chapman Stick, Fender P-Bass and Electric Sitar, to name just a few.
